MOSAIC PROJECT

MObility – Segregation – Aggregation - Interculturality – Commerce

MRTE / AGORA
Coordinator: Didier Desponds
Diana Burgos-Vigna and Aurore Merle
Migrants and cities: New empirical and theoretical challenges

- New flows of migrations due to the globalization
- New forms of settlement in the cities
- Super-diversity and Formation of “ethnoburbs”

Example: Aubervilliers with its 117 nationalities: a “world-city”
Real Estate purchases by households from three nationalities: China, India and subcontinent, Turkey (location at IRIS, infra-communal level, between 1996 and 2000) (source: BIEN database).

Real Estate purchases by households from three nationalities: China, India and subcontinent, Turquey (location at IRIS, infra-communal level, between 2001 and 2005) (source: BIEN database).
The Mosaic approach

- The city as a level of observation and analysis
- Migrants’ individual and collective choices
- Comparative analysis: between different nationalities; between different French and European cities

A comparison between Paris and Madrid
3 research axis

1. Residential strategies and settlement processes
2. Economic activities and mutations
3. Local citizenship and intercultural activities
Our methodology

Interdisciplinary approach: geography, sociology, political sciences and anthropology

A mix of quantitative and qualitative methods

Case studies in Paris (Aubervilliers, Cergy, Evry and Gonesse) and Madrid
Our research team

Collaboration with the University of Complutense in Madrid
Collaboration with the University of Caen, Evry Val d’Essonne and Poitiers

Specialists on residential strategies, on migrants’ economic activities, on specific forms of migration (Maghreb, Cameroun and Mali, India, China), on local citizenship and interculturality

The Topic

• Specific Challenge:

  A greater understanding of the social and economic effects and impacts of migration in Europe is needed in order to obtain an objective overview of developments and to address misperceptions. In light of recent and current migratory flows, an assessment of integration policies and efforts is equally important for ensuring their effectiveness in promoting the integration and inclusion of migrants in host societies.
